Mayor Nutter Opens Biodiesel Fueling Station; Miniscalco Construction Thanked for a Job Well Done

Philadelphia, PA May 27, 2009 – Philadelphia Mayor, Michael A. Nutter, opened a new biodiesel refueling station at the city's 3033 South 63rd Street Fleet Management facility. [Miniscalco Construction, L.L.C.](#) (Miniscalco Construction) received a special mayoral invitation to the press event as the primary contractor/installer of this first of five biodiesel refueling stations that are proposed as part of the city's "[Greenworks Philadelphia](#)" Plan. The new fueling station will provide some 240 city vehicles with cleaner burning blended B20 diesel fuel. City vehicles running on this bio fuel will produce 20% less hydrocarbons and result in a 10% reduction in lifecycle greenhouse gases.

The City of Philadelphia [Office of Fleet Management](#) contracted [Miniscalco Construction](#) to erect a 10,000 gallon above ground storage tank and fueling station at the site. [Miniscalco Construction](#) began work on the project in early March of 2009. Working directly with the city's engineer, Pennoni Associates Inc., [Miniscalco Construction](#) had to initially stabilize the tank slab area. Given the unsuitable characteristics of the native soils within tank footprint area, a reinforced, oversized spread slab footing was placed atop stabilized backfill. [Miniscalco Construction](#) performed all construction, piping, mechanical, and electrical and concrete work required for tank installation. [Work was completed on May 27, 2009](#) in time for the inaugural fueling of the first city fleet vehicle; Mayor Nutter personally dispensed biodiesel into a city fleet vehicle for the press event.

[Miniscalco Construction](#) provides full-service contracting and engineering services including both above and underground storage tank installations and removals, environmental remediation, utilities installation including heavy mechanical/industrial installations. [Miniscalco Construction](#) has been a member of [The H&K Group](#) Family of Companies since 2006. For more information on the referenced biodiesel fueling station installation project, [Miniscalco Construction](#), or [The H&K Group](#), please phone 610-2322-4090 or visit <http://www.hkgroup.com/>.
